Avery Proportional Cost Summary 060711.xls

[Here is the e-mail I sent that indicates we added the camp site line item. I couldn't find an e-mail from you about this, so I think we must have discussed it on the phone.](#)

Subject: Avery - proportional costs

Earl –

I've attached the revised spreadsheet with estimated proportional costs for the Avery Landing removal action.

The estimated proportional costs have been adjusted/increased as follows:

1. An additional \$500K for the camp for site workers, and
2. An additional \$500K for a larger, more conservative estimate of potentially-contaminated soil in the western portion of the site.
3. The estimated costs for road repair have been revised to apportion some of the costs to the other property owners, and not just 100% to FHWA.

With the additional contingency costs, the new estimated total is \$9.8 million.

In addition to the revised total cost, we adjusted the proportional work for each property owner. With a larger, more conservative estimate of contamination on the western portion of the property, the relative proportions for the three properties changed also, which also affected the proportional costs.

The new estimated proportional costs are summarized in the attached spreadsheet. Let me know if you have any questions.

Thanks,
Steve
